

AMENDMENTS TO THE SEQUENCE LISTING

An electronic copy of an amended Sequence Listing is being filed concurrently with this amendment. The previously provided Sequence Listing is being amended to incorporate two additional nucleotide sequences that have been given the sequence identifiers of SEQ ID NO:107 and SEQ ID NO:108. The nucleic acids defined by these sequence identifiers were shown in an illustration of an exemplary siRNA molecule depicted in the paragraph beginning on line 17, of page 45, of the as-filed application. SEQ ID NO:107 corresponds to the "top strand" of the depicted siRNA, and SEQ ID NO:108 corresponds to the "bottom strand."

This amendment is being provided at the request of the Examiner, in order to bring the specification into full compliance with 37 C.F.R. §§ 1.821 – 1.824. Applicants hereby request entry of the amended Sequence Listing into the application by the Examiner, and attest that the amended Sequence Listing does not add new matter to the application, because the two nucleic acid sequences being added to the Sequence Listing appeared in the specification of the application, as filed.
